

ELECTRIC SIT-STAND WORKSTATIONS

Environmental Data Sheet

Linak's ZERO™ Technology
reduces the typical standby
consumption of 1-2 W to just
0.1W

Both of UCI's electric
sit-stand workstation models,
Paradigm and Interchange,
are GECA certified

Componentry is made in UCI's
Adelaide-based manufacturing
plant, which has an environmental
management system
compliant with ISO14001
standards

Our Sustainability Journey

UCI's commitment recognises that sustainability is more than a destination, it is a journey of continual improvement.

Care for the environment is one UCI's corporate imperatives. We recognise the responsibility to respect and protect our environment, minimise waste and emissions. We use environmentally sustainable materials to create products that are not only ergonomically sound and easy to use, but kind to the environment as well. We have found that the quest for sustainability actually fuels sharper thinking and helps us design and source better products. UCI are members of GBCA and GECA and have a growing range of GECA certified products, and strive to work only with companies who have an accredited Environmental Management System to ISO14001 standard.
