Stacking

UCI's ongoing product development, performance improvement and enhancements may change designs, colours, dimensions and specifications.

Functionality and high quality are the main features of the Lacrosse table. It can be stacked tightly to save space, with the legs lying flat against each other. and has many variations in the form of six different folding frame designs, as well as tabletop shapes ranging from small to large and from square to trapezoid. With the option of integrated power sockets, personal network connectors and projectors, Lacrosse is ideal for a number of applications.
