

A close-up photograph of an office chair. The focus is on the armrest, which has a dark, glossy, curved top and a white, curved base. The backrest is made of a grey mesh material. The seat is upholstered in a brown leather-like material with visible stitching. The chair is set against a plain white background.

Allsteel®

Relate®

What If...

...a chair had the flexibility to fit in any environment?

...it came in any number of configurations to fit any application?

...it featured innovative technologies for the perfect fit?

The one answer to all three questions:

Relate. It's just that easy.

Conference Room

Add elegance and simplicity to meeting areas with polished aluminum base, fixed "C" arms, and mesh back.

Private Office

The slender silhouette of a high-back in Edelman leather and polished aluminum lends a sophisticated touch to a chair that's all business.

Open Office

High-intensity work areas call for a work chair with adjustable arms that does not sacrifice style. The multi-purpose side chair provides unusual comfort with a pivoting back for guests and coworkers.

Café

In collaborative spaces, armless side chairs and four-legged stools are perfect for people on the go.

One Family. Many Uses.

The Relate family works hard across the entire office. Models from stools to work chairs to conference room seating are available in multiple fabric and finish choices. Enjoy the timesaving convenience of selecting chairs for the entire office from one partner.

It's a single source solution for seating.

Green Fact: Relate is available for shipment with reduced cartoning or even blanket-wrapped. So it's doing good things for the environment even before you take delivery.

One Chair. Multiple Technologies.

Relate brings together several innovative technologies to create a chair that offers truly superior support no matter how or where you work. **It's all about exceptional ergonomics that relate to you.**

Work Targeting

Allows you to change your position and stay focused without interrupting your work.

Continuous Back Support
Promotes lordotic curvature in the lumbar region, which reduces muscle fatigue.

Quick Tension
The five-position lever is easy to reach and adjust, encouraging healthy movement and proper support.

Relate's breakthrough **Body Adaptive Control™** is a combination of a weight-sensing tilt and a pivoting back that follows your every shift in positions, encouraging healthy movement throughout the day.

Relate's unique tilt mechanism uses your weight to balance the recline, while the **Quick Tension™** lever is a simple, active adjustment that supports your changing workstyles throughout the day.

One Solution. Countless Comforts.

A variety of adjustments allow you to personalize your chair quickly, easily, and as frequently as you change your task.

Green Fact: Relate is an investment that has many returns. It is durably engineered to last a lifetime, so you can keep it in the office and out of the landfill.

1. Adjust the arm height, width, and depth based upon body size, task, and preference.
2. Increase or decrease the amount of effort needed to recline in the chair with the five settings on the Quick Tension lever.
3. Set the height-adjustable lumbar support anywhere within a 4-inch range.
4. Lock or unlock the back from an upright position with the tilt-lock.
5. Accommodate different leg lengths with a seat depth adjustment.
