Fixed Height Workstation

# Forum Fixed Height

The Forum fixed height workstation is our new addition to compliment the Forum family of cost-effective workstation solutions.

Designed and developed in Australia by UCI Manufacturing utilising a round leg frame, Forum provides a unique aesthetic over the traditional square and rectangular workstations.

Offering an endless selection of powder coat colours for the round leg workstation frame, Forum enables interior designers to specify the workstation frame colour to suit the office colour palette.

Forum fixed height workstation can be further enhanced with the UCI exclusive Fence screen solutions or with the Kinetik rail system. Alternatively, the traditional workstation look can be created by incorporating screens from the Zodiac family.

Forum fixed height workstations are proudly Australian made by UCI Manufacturing in our triple ISO certified manufacturing facility.

# Workstation Function

The Forum family is a versatile workstation that will compliment any office space. Forum is a highly configurable workstation system offering variable widths and depths to fit any work environment.

10 years on frame

**Product Lifecycle:**

UCI is committed to its impact on the environment. All workstation frames manufactured by UCI Manufacturing are designed for disassembly and are 95% recyclable.

Note: client specified materials are excluded from this statement.

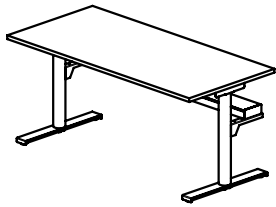

With the use of basic hand tools UCI Manufacturing workstation frames can be broken down into raw material elements such as aluminium, steel and plastic (Moulded plastic components greater than 50gm in weight have recycling logo identification).

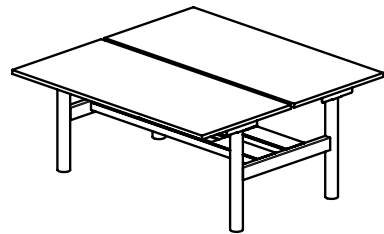

**RECYCLABLE**
