Sit Stand Workstation

Forum

The Forum workstation system offers a range of sit to stand solutions.

Designed and developed in Australia by UCI Manufacturing utilising a round lifting mechanism, Forum provides a unique aesthetic over the traditional square and rectangular workstations.

Forum provides an endless selection of powder coat colours for the surrounding workstation frame. Forum enables interior designers to specify the workstation frame colour to suit the office colour palette.

Forum can be further enhanced with the UCI exclusive Fence screen solutions or with the Kinetik rail system. Alternatively, the traditional workstation look can be created by incorporating screens from the Zodiac family.

Accessorise your Forum workstation with UCI's extensive range of workstation accessories.

Forum is proudly Australian made by UCI Manufacturing in our triple ISO certified manufacturing facility.

Workstation Function

Forum is a versatile workstation that will compliment any office space. With a height adjustment range to suit the user's requirements, whether sitting or standing, Forum is a highly configurable workstation system offering variable widths and depths to fit your work environment.

Height Adjustment Range:

620mm - 1275mm

Worktop Depth Range:

600mm - 850mm

Worktop Width Range:

Bench | B2B 900mm - 2400mm

L-Shape | T-Shape | 4-Way Main 1200mm - 2400mm

L-Shape | T-Shape | 4-Way Return 1200mm - 2400mm

120° | 3-Way 900mm - 1600mm

Product Lifecycle:

UCI is committed to its impact on the environment. All workstation frames manufactured by UCI Manufacturing are designed for disassembly and are 95% recyclable.

Note: client specified materials are excluded from this statement.

With the use of basic hand tools UCI Manufacturing workstation frames can be broken down into raw material elements such as aluminium, steel and plastic (Moulded plastic components greater than 50gm in weight have recycling logo identification).
