

MANGA™

From UCI's Design Team comes the Manga workstation system.

This highly capable range can adapt to solve the requirements of almost any work environment.

Its clean, resolved and attractive lines enhance the visual impact of a wide variety of office interiors, adding style and efficiency to your workplace.

With its technician height-adjustment feature, the Manga system can be customised to suit the individual, and can be individually tailored to compliment your workplace, adapting easily as business needs change.

A range of table options are also available as part of the Manga family.

Legs can be either angled or in-line to allow for more under-desk space and are available in a Mountain Ash woodgrain finish or any powder coat colour. Glides in chrome finish.

Finishes

- Worktops in your choice of finish
- Legs available in any powder coat colour or in a light beech woodgrain finish
- Glides in chrome finish

Please note: the wood grain finish is not a powder coat finish and is only durable against light impacts, as is the case with any timber finish
