At UCI, we understand current and future workspaces, tailoring solutions to fulfil individual needs.

The Flow workstation range is a modular frame system offering innovative, flexible design elements and an elegant aesthetic. It is designed to provide a clean and minimalist appearance in a variety of configurations, adding style and efficiency to your workspace.

The floating appearance of Flow's bench tops combined with its recessed, triangular leg profile, results in a workstation with a light and airy quality. Available in a variety of powdercoat colours.

Flow helps create the dynamic, interactive and collaborative working environments that are required in today's workspace, enabling teams to share information quickly and seamlessly. Adapting easily as business needs change, Flow can be individually tailored to compliment your environment, promoting efficiency and effectiveness.

A range of solutions designed to adapt to changing workstyles and needs, suitable for:

Individuals requiring privacy,

long-term structure and support

Teams wanting open and effective interaction and collaboration

Mobile workers needing quick and convenient set-up, with the ability to work individually or in teams
