An individual requires a system that provides a high ergonomic resolve, privacy, comfort, and a system that can transform with an ever changing, expanding and adapting environment.

suit yourself ?.....

details

System furniture should never be over complicated. transform™ uses a simple yet effective design approach.

This approach contributes to the design of an easy connection method for both assembly and disassembly.

This allows the process of adding and subtracting systems in the fitout to be simple.

transform™ incorporates a range of resolved components enabling you to individualise fitouts.

Create your own look for individual, team and collaborative environments.

team

optimise

In a team environment, communication between workers is paramount. transform™ creates a balance between individual privacy and group dynamics. It can also facilitate frequent reconfigurations and encourage worker communication - all aspects of strong and dedicated team work.

floor space

20,000 cycles*

AS/NZS 4442:1997

*Tested to Australian / New Zealand standards.

divide22™//narrow screen

modesty panels//fabric, metal and melamine

CPU cradles//one for every situation

features

Accessories are such an important component of any system. Cable management, document holders, adjustable shelves, storage units and privacy panels are all integral to a professional working environment.

The ease of applying such accessories allows transform™ to truly be the most flexible of its kind.
