

KINETIK

Modular Accessory System

Flexible, Dynamic and Creative

Kinetik

Kinetik Create

Product Story

When creating Kinetik we started with a simple concept – “to standardise the bespoke workspace”.

We understand that the workplace is occupied by diverse people with diverse requirements and that even if we were to customise a workstation to today’s user, that solution may not suit tomorrow’s.

Kinetik provides modular accessories that anyone can install, remove or relocate as needed. This results in a more comfortable and flexible environment that promotes productivity and efficiency.

Key Product Features

- > Rail system for modular relocatable accessories
- > Compatible with any UCI workstation system
- > Can be retrofitted to existing workstations
- > A range of Active Working Tools
- > Interchangeable Kinetik screens
- > Integrated cable access and soft wiring solutions
- > Single rail for individual and sit-stand workstations
- > Double rail for back-to-back workstation applications
- > Available in a broad range of powder coat colours
- > Australian made
- > 100% recyclable

Kinetik Flex

For individual workstations

Kinetik Flex makes your workspace well, flexible!

When designing working environments, compromises must often be made. The requirements of most may not suit the specific requirements of all.

Flex provides an opportunity to mix and match accessories according to the needs of each individual.

Not only can the workspace be tailored to immediate needs, it can evolve over time as needed.

Flex provides an accessory and screen solution that is totally independent of adjoining work points. In the modern workplace, with sit-to-stand workstations, this has become increasingly necessary. *Flex* ensures that storage and accessories are well within reach whether you're on your seat or on your feet.

Kinetik Create

For collaborative hubs

Where space is at a premium, the work point needs to perform multiple roles from one day to the next. What if a meeting table becomes a hot-desk or even a permanent workstation?

To efficiently address the needs of each application the *Create* workspace can be quickly and easily transformed with screens, task-lighting, soft wiring and storage.

Kinetik provides you with the tools to create the workspace you need today.

Kinetik Dynamic

For workstation clusters

Clustered workstations provide many benefits to the modern workplace though they also present challenges. Enhanced connection can promote communication and collaboration, however, such environments can also be distracting if the task at hand requires focus and concentration.

Kinetik creates a *Dynamic* workspace that can be adjusted when needed. Screens can be positioned for privacy and removed for greater interaction. Storage components and monitor arms can be positioned where convenient.

The *Kinetik* workspace challenges the need to compromise.

Kinetik Screens

Ideas

Kinetik offers a range of colour options to suit contemporary interior environments. Our PET Screens material provides a range of standard profiles or we can cut your designs to suit your working environment.

Active Working Tools

Kinetik Active Working Tools are a range of functional accessories and accessory mounts to tailor your workspace to your needs. While our primary focus is functionality, design simplicity is ideal for the contemporary office environment.

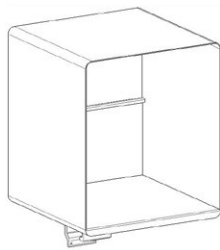

All our accessories and mounts feature our *Kinetik* locking mechanism that provides for a secure installation while allowing simple adjustment or removal as necessary.

Kinetik is designed and manufactured in South Australia from 100% recyclable materials.

UCI's manufacturing facility in South Australia differentiates itself from the competition by keeping all manufacturing processes in-house. In addition, our quality management system is ISO 9001 certified ensuring continuous improvement in systems and processes.

In 2005 we became one of the first workstation manufacturers to implement an environmental management system which has been ISO 14001 certified.

Our design team includes industrial designers, mechanical engineers and industry specialists leading to new and intelligent products. As part of the design process, all new products are tested in-house to Australian standards ensuring products stand the test of time. We stand behind our product quality with a limited 10-Year Warranty.
